A Simple Virtual Storage Network Demo

I'm still working on the fourth installment of the [Virtual Storage Network \(VSN\)](#) blog post [series](#), but I wanted to share this link to a [youtube video](#) that shows a very simple (2 port) VSN demo that we'll be showing next week at EMC World.

The topology that I'm using in the video is shown below.

The demo shows a File client in "VM1 Tenant 2" being connected to a File Share on the VNX via a VXLAN tunnel. The VSN-CS (which will be the subject of yet another blog post) was used to create the connection between "Tenant Y VSN" and "VLAN Y".

Thanks for reading and I hope to see you at [EMC World](#) next week!
