FCoE TechBook update for November 2011

An updated version of the FCoE TechBook (v11.0) has been posted to powerlink and emc.com.

New for this version is a case study that describes how to configure FCoE on the Nexus 7000 and MDS. The topology that is configured within the case study is shown below.

Also Shreedhan Nikam did a nice job updating the blade server section. Currently it contains Cisco UCS and IBM BladeCenter related information and we are expecting to add HP Blade server related information in a month or two.

Thanks for reading!
